

## Product Profiles

### 105 Day RM

## 2546 VT2PR 2546 GenSSR

- Outstanding yield potential in 105 Day hybrid
- Excellent Goss's Wilt tolerance
- Competes well across all yield environments
- Responds to higher management
- Excellent grain quality and high test weight

### PLANT CHARACTERISTICS

Relative Flowering	Late	Drydown	7
Ear Type	SF	Yield for Maturity	9
Early Vigor	8	Stalk Strength	8
Plant Height	T	Root Strength	7
Ear Height	MH	Test Weight	9
Stay Green	7	Cob Color	Pink

### MANAGEMENT CONSIDERATIONS

Maturity Zone	2,3&4	Light Soils	8
Drought Tolerance	8	Medium Soils	9
Corn on Corn	7	Dark Soils	10
Population Range	30-35	Poorly Drained Soil	6
Resp. to High Pop	MH	Nitrogen Utiliz.	Even
Green Snap Tol.	8	Silage Rating	9
Narrow Rows	9	Sulphonurea Sens.	N

### PLANT HEALTH

Anthraco nose	8	Gray Leaf Spot	7
SCLB	9	Eyespot	9
NCLB	8	Goss's Wilt	9
Fungicide Resp.	MH		

**Ear Height:** ML = Medium Low, M = Medium, MH = Medium High

**Stay Green:** means late-season plant health

**Relative Flowering:** Flowering period as compared to similar RM maturity hybrids; Early, Medium or Late

**Sulphonurea Sensitivity:** N = Normal tolerance to rimsulfuron-containing herbicides when label directions are followed

**Response to High Population:** ML = Moderately Low, M = Moderate, MH = Moderately High, H = High
