108 Day RM

3248 GT

Agrisure[®]GT

Agrisure[®]Viptera³¹¹¹

- Excellent root and stalk strength
- Consistent high yield performance
- Shines in all types of environments
- Excellent Goss's Wilt tolerance
- Very nice dual purpose hybrid

PLANT CHARACTERISTICS

Relative Flowering	Med	Drydown	8
Ear Type	SF	Yield for Maturity	9
Early Vigor	8	Stalk Strength	9
Plant Height	MT	Root Strength	9
Ear Height	M	Test Weight	8
Stay Green	8	Cob Color	Pink

MANAGEMENT CONSIDERATIONS

Maturity Zone	2,3&4	Light Soils	9
Drought Tolerance	9	Medium Soils	10
Corn on Corn	9	Dark Soils	9
Population Range	30-36	Poorly Drained Soil	9
Resp. to High Pop	MH	Nitrogen Utiliz.	Even
Green Snap Tol.	8	Silage Rating	9
Narrow Rows	8	Sulphonurea Sens.	N

PLANT HEALTH

Anthracnose	8	Gray Leaf Spot	7
SCLB	8	Eyespot	9
NCLB	9	Goss's Wilt	9
Fungicide Resp.	M		

Ear Height: ML = Medium Low, M = Medium, MH = Medium High

Stay Green: means late-season plant health

Relative Flowering: Flowering period as compared to similar RM maturity hybrids; Early, Medium or Late

Sulphonurea Sensitivity: N = Normal tolerance to rimsulfuron-containing herbicides when label directions are followed

Response to High Population: ML = Moderately Low, M = Moderate, MH = Moderately High, H = High
