

Product Profiles

110 Day RM

3606 Conventional 3606 GenSSR

- Super yielding in productive soils
- Large, girthy ear produces top yields
- Responds well to higher plant populations
- Excellent root system and strong stalks
- Good Green Snap tolerance

PLANT CHARACTERISTICS

Relative Flowering	Early	Drydown	8
Ear Type	SD	Yield for Maturity	10
Early Vigor	8	Stalk Strength	8
Plant Height	M	Root Strength	9
Ear Height	M	Test Weight	8
Stay Green	7	Cob Color	Red

MANAGEMENT CONSIDERATIONS

Maturity Zone	2,3&4	Light Soils	8
Drought Tolerance	9	Medium Soils	9
Corn on Corn	8	Dark Soils	10
Population Range	32-38	Poorly Drained Soil	9
Resp. to High Pop	H	Nitrogen Utiliz.	Even
Green Snap Tol.	9	Silage Rating	8
Narrow Rows	10	Sulphonurea Sens.	N

PLANT HEALTH

Anthracnose	7	Gray Leaf Spot	7
SCLB	9	Eyespot	9
NCLB	8	Goss's Wilt	8
Fungicide Resp.	MH		

Ear Height: ML = Medium Low, M = Medium, MH = Medium High

Stay Green: means late-season plant health

Relative Flowering: Flowering period as compared to similar RM maturity hybrids; Early, Medium or Late

Sulphonurea Sensitivity: N = Normal tolerance to rimsulfuron-containing herbicides when label directions are followed

Response to High Population: ML = Moderately Low, M = Moderate, MH = Moderately High, H = High
