

Product Profiles

111 Day RM

3699 Conventional

- A top end yielding Non-GMO hybrid
- Best performance at higher plant populations
- Excels in productive, fertile soils
- Flexes girthy ears with thick, deep kernels
- Benefits from fungicide on corn ground

PLANT CHARACTERISTICS

Relative Flowering	Early	Drydown	8
Ear Type	SF	Yield for Maturity	9
Early Vigor	8	Stalk Strength	8
Plant Height	M	Root Strength	8
Ear Height	M	Test Weight	8
Stay Green	7	Cob Color	Red

MANAGEMENT CONSIDERATIONS

Maturity Zone	3&4	Light Soils	8
Drought Tolerance	8	Medium Soils	8
Corn on Corn	8	Dark Soils	9
Population Range	31-35	Poorly Drained Soil	8
Resp. to High Pop	MH	Nitrogen Utiliz.	Even
Green Snap Tol.	8	Silage Rating	8
Narrow Rows	8	Sulphonurea Sens.	N

PLANT HEALTH

Anthracnose	8	Gray Leaf Spot	7
SCLB	8	Eyespot	8
NCLB	8	Goss's Wilt	8
Fungicide Resp.	MH		

Ear Height: ML = Medium Low, M = Medium, MH = Medium High

Stay Green: means late-season plant health

Relative Flowering: Flowering period as compared to similar RM maturity hybrids; Early, Medium or Late

Sulphonurea Sensitivity: N = Normal tolerance to rimsulfuron-containing herbicides when label directions are followed

Response to High Population: ML= Moderately Low, M = Moderate, MH = Moderately High, H = High
