

Land & Livestock Blend

Winter Rye/Radish

- Easy to manage for being an overwintering blend
- Very good fall and spring weed suppression
- Builds soil below ground and protects it above
- Low risk of establishment comparatively

Description:

An easy to manage blend of reCLAIM radish and reSTORE winter rye. The deep rooting radish will scavenge nutrients and alleviate compaction. Cereal rye is one of the most aggressive nitrogen scavengers and helps to suppress tough to manage weeds, including winter annuals like marestail. Can be used as a forage in both spring and fall.

8% Radish

92% Winter Rye

Management

Overall Management Level	Medium
Over Wintering Ability	Excellent
Seeding into Corn	Highly Recommended
Seeding into Soybeans	Highly Recommended
Seeding before Corn	Need Experience
Seeding before Soybeans	Highly Recommended
Fall Forage	Very Good
Spring Forage	Very Good
Seeding Depth	1/2" deep

Recommended Seeding Rates

Seeding Method	Pounds per Acre	
	General	Forage
Drilling	50 lbs.	75 lbs.
Broadcast	65 lbs.	75 lbs.
Aerial	65 lbs.	75 lbs.
Precision Planting	40 lbs.	60 lbs.

Termination

reCLAIM radish dies around 15 degrees. Burndown winter rye with one quart of glyphosate. Best control is achieved by spraying on a warm day between 9 a.m. and 2 p.m. with water adjusted to 5.5 pH or lower. If radishes do not winter kill, add one pint of 2,4-D type of herbicide.
